Date Safe Project,

Dear Mike,

I just wanted to thank you for the presentations you did in our community. As you know Yuma is a small community close to the Mexican border. We have a high teen pregnancy rate, and the community works hard with many types of programs to reach the teens and help them make better choices.

Our Abstinence Plus program has been very successful in the junior highs. Your presentations to the two junior highs: 500 and 440 teens, were outstanding. These teens were rowdy audiences, but you handled them expertly, got and held their attention and really made an impact. Even the School Principals who are somewhat conservative were very impressed.

The Train the Trainer session later was wonderful and very helpful in learning how to engage the teens successfully.

We want to have you back as soon as all our schedules will allow. I look forward to working with you again.

Sincerely,

*Anne Smith RN, BSN*
